## TIC TAC TOE

There are a couple of different ways that you can use this file. If you are playing with your child, feel free to adjust it as needed. You may want to complete the exercises with your child from the first Tic Tac Toe board. If you are unable to complete the activities yourself, you can just have your child do each move 😊

For the second option of Tic Tac Toe, I have included some longer activities. These particular games and activities may take all day to complete or at least a couple of hours. Each Tic Tac Toe game does not need to be completed all in one sitting. These activities are geared more towards kids, so if you are playing with your child, you can do the activities with them, or they can complete them on their own.

Both of these Tic Tac Toe games also work well if you have more than one child and they want to play the games together.
